POMPE DI RAFFREDDAMENTO MOTORE E RICAMBI (Engine cooling pumps and spare parts)

Questa sezione del catalogo illustra una gamma di pompe di raffreddamento per applicazioni su motori e gruppi elettrogeni marini. Nelle pagine che seguono sono riportati i modelli di pompe ed i relativi ricambi originali dei principali produttori quali **JOHNSON PUMP**, **JABSCO**, **SHERWOOD** e **ANCOR**, che nel complesso coprono l'intera gamma di applicazioni in campo marino.

This section of the catalog shows a range of cooling pumps for applications on marine engines and generators. In the pages that follow there are the models of pump and its original spare parts of leading manufacturers such as **JOHNSON PUMP**, **JABSCO**, **SHERWOOD** and **ANCOR**, which together cover the entire range of marine applications.

POMPE DI RAFFREDDAMENTO CON BASE (Footstall cooling Pumps)

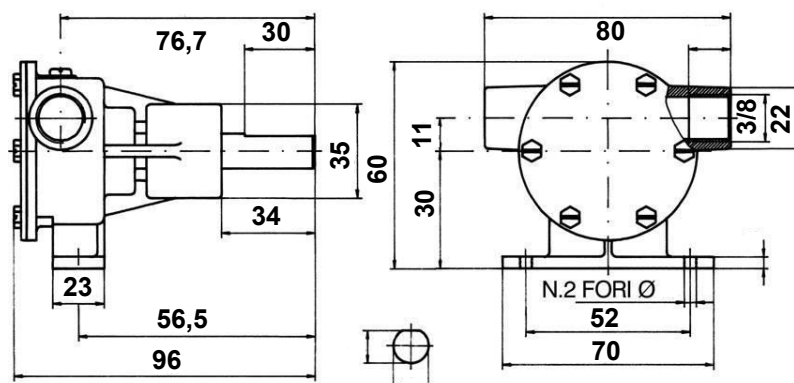

Pompa di raffreddamento motore con piede di supporto. Bocche da 3/8" gas
(Footstall engine cooling pump with 3/8" gas threaded ports)

24.0195007020 Estrattore (Tool) 65 - 118 mm

ESTRATTORE PER GIRANTI (Impeller Removal Tool)

Estrattore per giranti per effettuare la sostituzione della girante evitando danni al corpo della pompa che si possono verificare utilizzando attrezzi non idonei. Disponibile in due misure per tutti i modelli di girante elastica.

Simple to use, this impeller removal tool avoids damage to pump body and fits all makes of flexible impeller.

Nelle pagine che seguono sono riportate le tabelle delle giranti e dei ricambi relativi ai principali modelli di pompe **JOHNSON PUMP**, **JABSCO**, **SHERWOOD** e **ANCOR**

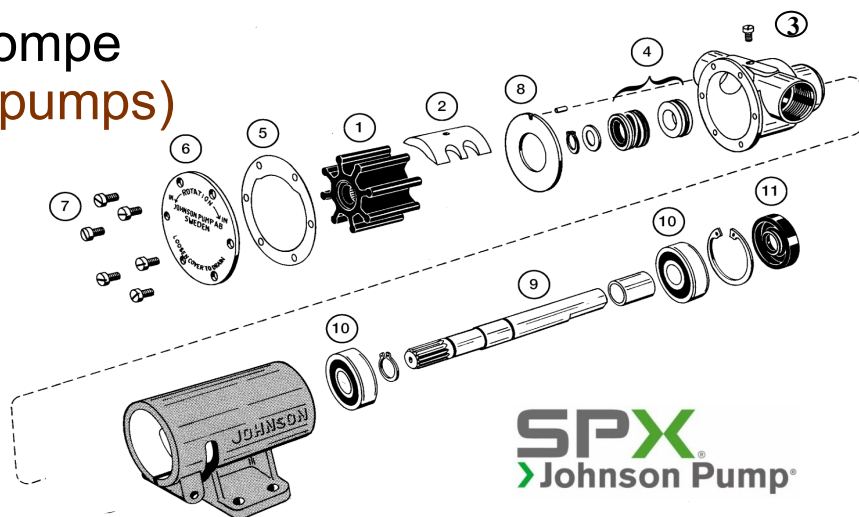

The following pages show the impeller and spare parts tables for the main models of **JOHNSON PUMP**, **JABSCO**, **SHERWOOD** e **ANCOR** engine cooling pumps

* Il kit tenuta meccanica 15955 deve essere usato solo sulle pompe dove il kit asse originale ha la sede del seager tra la girante e il primo cuscinetto. NON usare il kit tenuta 15955 con i kit asse attualmente forniti al ricambio 25119 o 25120 previsti per la nuova tenuta a pressione 25115.

** Quando sostituite il kit asse originale della pompa con i nuovi kit asse attuali 25119 o 25120, è necessario montare anche il nuovo kit tenuta meccanica 25115. Il nuovo kit asse 25119 o 25120 si distinguono dal vecchio tipo per l'assenza della sede del seager tra la girante e il primo cuscinetto. NON usare la tenuta 15955 con i nuovi kit asse 25119 e 25120.

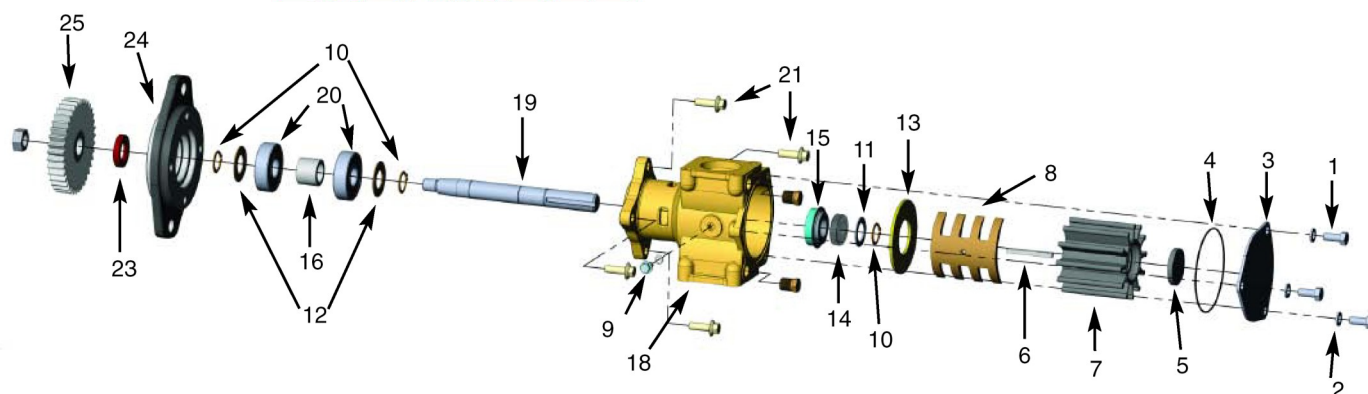

* 15955 seal kit is to be only used with the original pump shaft and bearing assembly that has a snap ring groove between the impeller and the first ball bearing. DO NOT use the 15955 seal kit with the 25119 and 25120 shaft bearing assembly designed for the pressed-on seal seat.

** When replacing the original pump shaft bearing assembly with the new 25119 or 25120, the 25115 new mechanical seal kit must also be used. The 25119 and 25120 shaft and bearing assembly can be identified by the absence of the snap ring groove between the impeller and the first ball bearing. DO NOT use the 15955 seal kit with the 25119 and 25120 shaft and bearing assembly.

13	Spessore	15959		-
14/17	Kit tenuta * (Kit tenuta new)	15955 (25115)		- (25115)
15	Seager	15942		15942
16	Kit Asse con cuscinetti	25100		25100

* Il kit tenuta meccanica 15955 deve essere usato solo sulle pompe dove il kit asse originale ha la sede del seager tra la girante e il primo cuscinetto. NON usare il kit tenuta 15955 con il kit asse attualmente fornito al ricambio 25100 previsto per la nuova tenuta a pressione 25115.

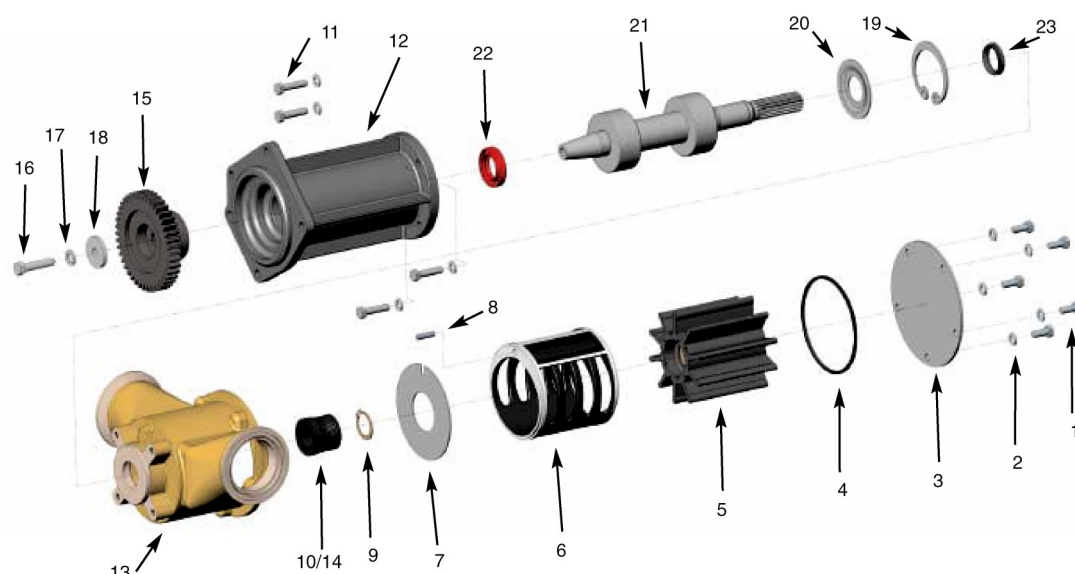

** Quando sostituite il kit asse originale della pompa con il nuovo kit asse attuale 25100, è necessario montare anche il nuovo kit tenuta meccanica 25115. Il nuovo kit asse 25100 si distingue dal vecchio tipo per l'assenza della sede del seager tra la girante e il primo cuscinetto. NON usare la tenuta 15955 con il nuovo kit asse 25100.

* 15955 seal kit is to be only used with the original pump shaft and bearing assembly that has a snap ring groove between the impeller and the first ball bearing. DO NOT use the 15955 seal kit with the 25100 shaft bearing assembly designed for the pressed-on seal seat.

** When replacing the original pump shaft bearing assembly with the new 25100, the 25115 new mechanical seal kit must also be used. The 25100 shaft and bearing assembly can be identified by the absence of the snap ring groove between the impeller and the first ball bearing. DO NOT use the 15955 seal kit with the 25100 shaft and bearing assembly.

Guida ai ricambi per pompe (Spare parts guide for pumps)

GIRANTI PER POMPE DI RAFFREDDAMENTO (Cooling pump flexible Impellers)

ESTRATTORE PER GIRANTI (Impeller Removal Tool)

Estrattore per giranti per effettuare la sostituzione della girante evitando danni al corpo della pompa che si possono verificare utilizzando attrezzi non idonei. Disponibile in due misure per tutti i modelli di girante elastica.

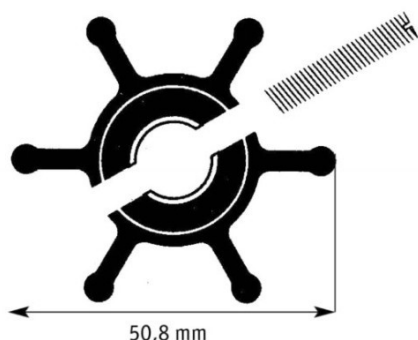

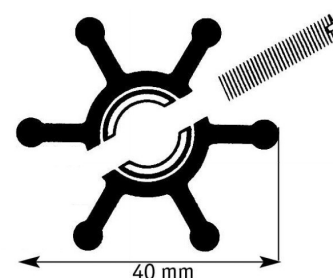

Simple to use, this impeller removal tool avoids damage to pump body and fits all makes of flexible impeller.

24.0195007004 Estrattore (Tool) 40 - 65 mm
24.0195007020 Estrattore (Tool) 65 - 118 mm
